Words From The Product Designer

Hi friends,

This is Mason from Glocusent, and it is so nice to show my appreciation for your support through our original designed product. I want to share the story and tips on using the Glocusent lantern better because it is more than an outdoor lantern.

Long story short, it starts with the sad news of the Texas Snow Disaster in 2021. Our team was devastated to hear the news, and we recognized that we needed to do something within our ability to change the situation. That is how we decided to set the next goal of designing a product that can help thousands of families survive unexpected disasters.

Motivated, we built our line of camping lanterns emitting 360 degrees of light. You never have to struggle in the dark again. Apart from all the standard functions that come with an outdoor lantern, here are some tips for you to better understand the emergency lantern and it could be conducive when the extreme happens:

- When fog penetrates the forest, hazing and graying your views through the trees, you can turn on the 3000k when walking through fog so you can see clear through mists.
- Press two buttons together to turn on the 1200 LM light when it is exceptionally dark; this extreme mode will only last for 3 minutes. (Please avoid direct eye contact.)
- Don't panic when it drops into the water. The lantern has passed the IP68 dust-proof and waterproof rating and will survive in 1.5-meter water.

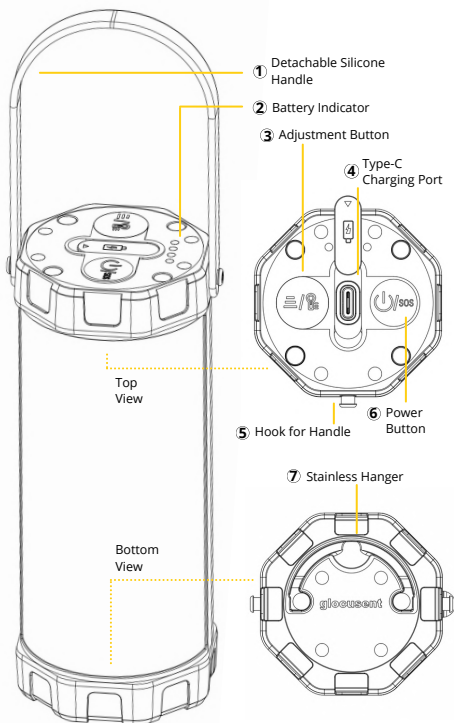

- Don't panic if it slips away from your hands or bumps on the rock; the lantern passed the military-level drop test.
- By long pressing the power button, turn on the SOS light when in danger.
- It can be frustrating if you don't know how much power is left for the light. We added four blue indicator lights on top of the lantern to inform you when you need to charge it.
- When there is a power outage, or you are in the woods for days, our lantern can operate for about 80 hours or 10 nights (in the lowest setting).

We considered all different scenarios in that you might be in the dark to design this light. It lets you see everything and avoid potential dangers in most dark environments.

Our rechargeable lantern can bring you conveniences in life, more fun during your outdoor adventures, and even be an essential helper when needed. We genuinely hope you have a happy and safe life with Glocusent lighting aid.

Thanks for being supportive,
Mason

1200LM

Super Bright for Extreme Conditions
(20W, Last for 3 minutes)

Precautions

- Use provided charging cord or any third-party certified charging cable to charge the lantern.
- Make sure to fully charge till all indicator lights are on before first use.
- Please do not look directly at the LED light, or point the light directly to others' eyes, especially when it is at its brightest level. It could hurt the eyes.
- Please charge it at least once every 6 months to maintain the battery's lifespan.
- Please avoid placing in an extreme temperature environment (either too hot or too cold).
- Please keep it away from children.
- Disposal: When you are ready to dispose of the product after wearing it out, please follow your local government's instructions for environmental and safety purposes.

How to Charge the Camping Light

1. Plug the provided USB-C cable into the charging port on the top, and connect it with a 5V-2A power plugger.
2. It takes about 4 - 5 hrs to charge fully.
3. Please fully charge the product before first use.

Note: The indicating lights will flash when it is on charging, and four indicating lights will be on when the camping light is fully charged.

Features

- IP68 Ratings for Waterproof & Dust-proof
- Seeing Through Fogs
- 3 Color Temperatures :
 - Cool White 3000K** - Can see through fog;
 - Warm White 4000K** - Suggest to use when you are walking at night;
 - Natural White 6000k** - Best for hanging it in your camping tent.
- 5 Brightness Levels
- SOS Emergency Light
- 3 Minutes 1200LM super bright for extreme condition
- Battery power indicator lights
- Memory the last settings of color temperature when turning off
- 5000mAh battery allows the lantern to work for 80 hours (It may vary for different settings)

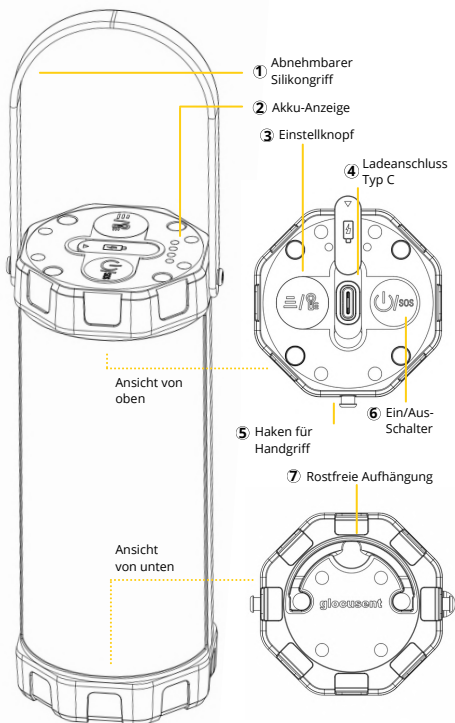

Product Specifications

Vorsichtsmaßnahmen

- Verwenden Sie zum Aufladen der Laterne das mitgelieferte Ladekabel oder ein zertifiziertes Ladekabel eines Drittanbieters.
- Laden Sie die Laterne vor dem ersten Gebrauch vollständig auf, bis alle LEDs leuchten.
- Schauen Sie nicht direkt in das LED-Licht oder richten Sie das Licht nicht direkt auf die Augen anderer, insbesondere wenn es am hellsten ist. Dies könnte Ihre Augen schädigen.
- Bitte laden Sie den Akku mindestens alle 6 Monate auf, um seine Batterie zu vermeiden Sie es
- das Gerät in eine Umgebung mit extremen Temperaturen zu bringen (entweder zu heiß oder zu kalt).
- Außerhalb der Reichweite von Kindern aufbewahren.
- Entsorgen: Wenn Sie das Produkt nach seiner Abnutzung entsorgen möchten, befolgen Sie bitte die Anweisungen Ihrer örtlichen Behörden für Umwelt- und Sicherheitszwecke.

Aufladen der Camping-Laterne

1. Stecken Sie das mitgelieferte USB-C-Kabel in die Ladebuchse an der Oberseite und verbinden Sie es mit einer 5 V-2 A Steckdose.
2. Der Ladevorgang dauert ca. 4-5 Stunden.
3. Bitte laden Sie das Produkt vor dem ersten Gebrauch vollständig auf.

Hinweis: Während des Ladevorgangs blinken die LEDs, und wenn die Camping-Laterne vollständig aufgeladen ist, leuchten vier LEDs.

Eigenschaften

- IP68-Zertifizierung für Wasser- und Staabdichtigkeit
- Sehen durch Nebel
- 3 Farbtemperaturen:
Kaltweiß 3.000K- zum Sehen durch Nebel;
Warmes Weiß 4.000K - am besten für Nachspaziergänge geeignet;
Natürliches Weiß 6.000K - am besten im Campingzelt zu verwenden
- 5 Helligkeitsstufen
- SOS-Notlicht
- 3 Minuten 1.200 LM superhell für extreme Bedingungen
- Batterieanzeige
- Speichert beim Ausschalten die zuletzt eingestellte Farbtemperatur
- 5.000 mAh Akku ermöglicht eine Leuchtdauer von 80 Stunden (kann je nach Einstellung variieren)

Précautions

- Pour recharger la lanterne, utilisez le câble de charge fourni ou tout autre câble de charge certifié par une tierce partie.
- Avant la première utilisation, veuillez à charger complètement la lanterne jusqu'à ce que tous les voyants s'allument.
- Veuillez à ne pas regarder directement la lumière LED et à ne pas diriger la lumière directement vers les yeux d'autrui, en particulier lorsqu'elle est à son niveau le plus lumineux. Cela pourrait nuire aux yeux.
- Il convient de recharger l'appareil au moins une fois tous les 6 mois afin de préserver la durée de vie de la batterie.
- Veuillez éviter de la ranger dans un environnement aux températures extrêmes (trop chaudes ou trop froides).
- Veuillez à ce qu'elle ne soit pas laissée à la portée des enfants.
- Mise au rebut : si vous souhaitez vous débarrasser du produit après l'avoir utilisé, veuillez suivre les directives de votre gouvernement local pour des raisons de sécurité et de protection de l'environnement.

Procédure de chargement de la lampe de camping

1. Branchez le câble USB-C fourni dans le port de charge situé sur la partie supérieure, et connectez-le à une prise de courant de 5V-2A.
2. Il faut compter environ 4 à 5 heures pour une charge complète.
3. Il convient de charger complètement le produit avant de l'utiliser pour la première fois.

Remarque : les voyants lumineux vont clignoter lorsqu'il est en cours de charge, et quatre voyants lumineux seront allumés lorsque la lampe de camping est complètement chargée.

Caractéristiques

- Indice IP68 pour l'imperméabilité à l'eau et à la poussière
- Permet de voir à travers le brouillard
- 3 températures de couleur :
 - Blanc froid 3000K**- pour voir à travers le brouillard ;
 - Blanc chaud 4000K** - à utiliser lorsque vous promenez la nuit ;
 - Blanc naturel 6000K** - idéal pour l'accrocher dans votre tente de camping
- 5 niveaux de luminosité
- Lumière d'urgence SOS
- Lumière super lumineuse de 1200LM pendant 3 minutes pour les conditions extrêmes
- Indicateur de charge de la batterie
- Permet de mémoriser les derniers réglages de la température de couleur lors de la mise hors tension
- Grâce à la batterie 5000mAh, la lanterne peut fonctionner pendant 80 heures (Cela peut varier en fonction des réglages).

Precauzioni

- Per ricaricare la lanterna, utilizzare il cavo di ricarica in dotazione o qualsiasi altro cavo di ricarica certificato da terzi.
- Assicurarsi di caricare completamente la lanterna fino all'accensione di tutte le spie prima del primo utilizzo.
- Si prega di non guardare direttamente la luce LED e di non puntare la luce direttamente verso gli occhi degli altri, soprattutto quando è al massimo della luminosità. Potrebbe danneggiare gli occhi.
- Caricare la batteria almeno una volta ogni 6 mesi per preservarne la durata.
- Si prega di evitare di posizionarla in un ambiente a temperature estreme (troppo calde o troppo fredde).
- Si prega di tenerla lontana dai bambini.
- Smaltimento: Quando si è pronti a smaltire il prodotto dopo averlo usurato, si prega di seguire le istruzioni del governo locale per motivi ambientali e di sicurezza.

Come Ricaricare la Lampada da Campeggio

1. Inserire il cavo USB-C in dotazione nella porta di ricarica sulla parte superiore e collegarlo con un alimentatore da 5V-2A.
2. Per una ricarica completa sono necessarie circa 4 - 5 ore.

Si prega di caricare completamente il prodotto prima del primo utilizzo.

Nota: Le spie luminose lampeggiano quando è in carica e quattro spie luminose si accendono quando la luce da campeggio è completamente carica.

Caratteristiche

- Classificazione IP68 per l'impermeabilità e la resistenza alla polvere
- Per vedere Attraverso la Nebbia
- 3 Temperature di Colore:
Bianco Freddo 3000K - Può Vedere Attraverso la Nebbia;
Bianco Caldo 4000K - Si consiglia di usare quando si cammina di notte;
Bianco Naturale 6000K - Migliore per appenderla nella tenda da campeggio
- 5 livelli di luminosità
- Luce di Emergenza SOS
- 3 minuti a 1200LM super luminosi per condizioni estreme
- Spia luminosa di ricarica della batteria
- Memorizzazione delle ultime impostazioni della temperatura di colore quando si spegne
- La batteria da 5000mAh permette alla lanterna di funzionare per 80 ore (Può variare per impostazioni diverse)

Precauciones

- Utilice el cable de carga proporcionado o cualquier cable de carga certificado de terceros para cargar el farol.
- Asegúrese de cargar por completo hasta que todas las luces del indicador estén encendidas antes del primer uso.
- No mire de manera directa hacia la luz LED, ni apunte la luz directamente a los ojos de otras personas, en especial si está en el nivel más alto de brillo. Puede dañar los ojos.
- Cárguelo al menos una vez cada 6 meses para mantener la vida útil de la batería.
- Evite colocarlo en un ambiente de temperatura extrema (ya sea muy caliente o muy frío).
- Manténgalo lejos de niños.
- Desecho: Cuando esté listo para desechar el producto luego de su desgaste, siga las instrucciones locales de su gobierno por razones del medioambiente y de seguridad.

Como cargar la luz para acampar

1. Enchufe el cable USB C dentro del puerto de carga de la parte superior, y conéctelo con un enchufe de 5 V – 2 A.
2. Tardará unas 4 a 5 horas en cargarse por completo.
3. Cargue por completo el producto antes del primer uso.

Nota: Las luces indicadoras titilarán cuando se esté cargando, y se encenderán las cuatro luces indicadoras cuando la luz para acampar esté cargada por completo.

Funciones

- Clasificaciones IP68 de resistencia al agua y polvo
- Ver a través de neblinas
- 3 temperaturas de color:
Color blanco frío 3000 k:- Puede ver a través de neblina;
Color blanco cálido 4000 k: - Recomendado para caminar por la noche;
Color blanco natural 6000 k: - Recomendado para colgar sobre su carpa para acampar
- 5 niveles de brillo
- Luz de emergencia SOS
- 3 minutos de súper brillo de 1200 LM para una situación extrema
- Luces indicadoras de energía de la batería
- Memoria de las últimas configuraciones de temperatura de color al apagarse
- Batería de 5000 mAh permite que el farol funcione por 80 horas (puede variar según las configuraciones)

ご注意

- 付属の充電コードまたは第三者に認定された充電ケーブルでランタンを充電してください。
- 初回使用の前に、すべてのインジケータライトが点灯するまで満充電してください。
- 特に明るさがマックスになるときに、LEDライトを直視したり、ライトを他人の目に直接向けたりしないでください。目を傷つける恐れがあります。
- バッテリーの使用寿命を延ばすために、少なくとも6か月に1回は充電してください。
- 極端な温度環境（暑すぎたり寒すぎたり）に置かないでください。
- お子様の手の届かないところに保管してください。
- 廃棄：使い古した製品を廃棄する場合は、環境および安全上の理由から、地方自治体の指示に従ってください。

充電方法

1. 付属のUSB-Cケーブルを上部の充電ポートに差し込んでから、5V-2Aの充電アダプターに接続してください。
 2. 4～5時間程度で満充電が可能です。
 3. 初回使用の前に製品を満充電してください。
- 充電中はが点滅し、キャンプライトが満充電になると4つのインジケータが点灯します。**

特徴

- 防水・防塵規格IP68
- 霧の中でも見えます
- 3つの色温度：
クールホワイト3000K- 霧の中でも見えます。
温白色4000K - 夜の散歩に適用します。
昼白色6000K - キャンプテントに吊るすのに最適です
- 5つの輝度レベル
- SOS非常灯
- 3分間1200LMの超高輝度で極限状態に対応できます
- バッテリー残量のインジケーター
- 電源を切るときに色温度の最後の設定を記憶します
- 5000mAhのバッテリーは80時間の動作時間を確保。(点灯モードによって異なる場合があります)。

About Glocusent

Since we saw our first sunrise illuminate the beautiful Colorado Springs, we've become a lighting production company that believes light is critical to capturing the magic in moments. No progress was ever made in the dark, and we're here to deliver that light to ensure that our users are always progressing. From neck lights to portable ring lights, every one of our products is designed to provide light in a simple and convenient way. At Glocusent, we stand for three core principles; glory, focus, and moments.

Glory: We're about bringing light to your life, and we believe life is full of **glory**, whether in your career or with your family. Let us shine a light on that glory.

Focus: Our team at Glocusent focuses on creating innovative lights and lamps that are convenient, smart, and tailored to its user. With our lights, you can focus on what matters. In the wise words of Roy T. Bennett, "Life is short; **focus** on what matters; you should change your priorities over time."

Moment: Moments are fleeting. Your lives consist of beauty, romance, and happiness. Our innovative lights are there to help you capture the **moments**.
